The panopticon is a type of institutional building and a system of control designed by the English philosopher and social theorist Jeremy Bentham in the late 18th century. The scheme of the design is to allow all (pan-) inmates of an institution to be observed (-opticon) by a single watchman without the inmates being able to tell whether or not they are being watched.

Panopticon - Wikipedia

The modern profession of architecture echoes with its origins, its rich history, and the fast-paced changes of the 21st century. Through antiquity, architecture and construction were united by the cultural intentions of a "Master Builder," who balanced art, science, materials, form, style and craft to achieve his vision. "The regulated profession of architecture is relatively new.

2. Make a Habit of Continuous Planning. Planning may be the second of the Project Management Institute's five phases of project management, but construction project managers should start planning long before actual construction begins, and continue revising and developing plans until the project ends. The design, pre-construction, and procurement stages of a construction project each require ...

5 Strategies of a Successful Construction Project Manager ...

With over 500,000 users downloading 3 million documents per month, the WBDG is the only web-based portal providing government and industry practitioners with one-stop access to current information on a wide range of building-related guidance, criteria and technology from a 'whole buildings' perspective.
