### **Life Cycles Acorn Plus Natural**

Acorn Life Cycle's First Stage. The first stage of the acorn seedling's life is fruiting. This is when an acorn grows on the oak tree, which happens through the spring and summer shortly after the tree has flowered in the spring. Different type of acorns can fall at various times. For example, toward the end of the summer or in early fall,...

Acorn Germination. The life cycle of the oak tree begins with the germination of an acorn. Favorable soil conditions allow for the acorn to send down a tap root. Shortly after germination, a young oak shoot emerges from the ground as a sapling. Tree Growth. According to World Book, oak trees grow very slowly and live up to 400 years.

### **The Life Cycle of Oak Trees | Garden Guides**

Life Cycle of Oak Trees. Individual trees can live for a hundred years or more, far longer than the gardener who plants them. Botanists divide oak trees into two basic groups: white oaks and red oaks. Each group has a different life cycle, but both include flowering, fruiting, seed dispersal, germination and maturation.

An oak tree begins its life cycle with the germination of an acorn which produces a small root, resulting in the growth of a sapling tree. Flowers that have a greenish color appear in the spring on mature trees, producing pollen for fertilization and the growth of new acorns that repeat the life cycle. Keep Learning.
