Reverse Speech

Reverse speech is a pseudoscientific topic first advocated by David John Oates which gained publicity when it was mentioned on Art Bell's nightly Coast to Coast AM radio talk show. It claims that during spoken language production, human speakers subconsciously produce hidden messages that give insights into their innermost thoughts. Oates claims that it has applications in psychotherapy ...

Reverse Speech - Voice of the Unconscious Mind

Backmasking has been used as a recording technique since the 1960s. In the era of magnetic tape sound recording, backmasking required that the source reel-to-reel tape actually be played backwards, which was achieved by first being wound onto the original takeup reel, then reversing the reels so as to use that reel as the source (this would reverse the stereo channels as well).
