Science Explorer Human Biology And

We share breaking science news and articles on variety of topics from the leading universities and research institutions around the globe. It is your ultimate guide to Biological Web Resources ranging from DNA to Plants & Animals and everything in-between. This site was originally developed for the researchers involved in biological studies but we want to make the science more enjoyable to ...

Welcome To Biology Explorer | Biology News | BioExplorer.net

Biology: Biology, study of living things and their vital processes that deals with all the physicochemical aspects of life. Modern principles of other fields, such as chemistry, medicine, and physics, for example, are integrated with those of biology in areas such as biochemistry, biomedicine, and biophysics.

Genomics is an interdisciplinary field of biology focusing on the structure, function, evolution, mapping, and editing of genomes. A genome is an organism's complete set of DNA, including all of its genes. In contrast to genetics, which refers to the study of individual genes and their roles in inheritance, genomics aims at the collective characterization and quantification of genes, which ...

Genomics - Wikipedia

The history of biology traces the study of the living world from ancient to modern times. Although the concept of biology as a single coherent field arose in the 19th century, the biological sciences emerged from traditions of medicine and natural history reaching back to ayurveda, ancient Egyptian medicine and the works of Aristotle and Galen in the ancient Greco-Roman world.

History of biology - Wikipedia

Use the filters to find what EWU can offer you. Sort by division, type, or use the keyword search to get started.

Program Explorer - Eastern Washington University

One of the greatest scientific feats of our era is the astonishing progress made in understanding the intricate machinery of life. We are living in the most productive phase so far in this quest, as researchers delve ever deeper into the workings of living systems, turning their discoveries into new medical treatments, improved methods of growing food, and innovative new products.
