Expectancy Theory. The expectancy theory of motivation has become a commonly accepted theory for explaining how individuals make decisions regarding various behavioral alternatives.

Expectancy theory offers the following propositions: When deciding among behavioral options, individuals select the option with the greatest motivation forces (MF).

Multiple Intelligences. Howard Gardner of Harvard has identified seven distinct intelligences. This theory has emerged from recent cognitive research and "documents the extent to which students possess different kinds of minds and therefore learn, remember, perform, and understand in different ways," according to Gardner (1991).
